

## **CO - Denver – Geologist, Scientist, or Environmental Engineer**

**We are looking for experienced Geologists, Environmental Engineers, and Geoscientists to staff our Denver, Colorado office. The chosen candidates will support Oil and Gas clients in Colorado, North Dakota and Texas.**

### **Job Description:**

- Act as technical lead during the development and implementation of environmental assessment and remediation projects
- Develop SPCC Plans and manage SWPPP Compliance Monitoring programs
- Develop and maintain effective client and regulatory relations
- Direct and supervise technical assignments and manage projects from budgetary, regulatory and staffing perspective
- Remedial Design and Implementation
- Remediation System optimization, operation, and maintenance
- Prepare Environmental Assessment Work Plans and Site Assessment Reports
- Soil, Water, and Air Permitting and Compliance

### **Desired Skills and Experience**

- Bachelor's degree in Engineering or Geoscience
- 5+ years relevant experience
- Knowledge of regulatory requirements for various government agencies
- An individual with strong written and oral communication skills, strong desire to provide excellent, innovative, practical customer services and a commitment to technical excellence
- Must be well organized, have the ability to manage and prioritize several assignments at one time; deliver on time and on budget
- Must pass drug test, background check and must have a satisfactory driving record in accordance with the Company's driving policy
- 40-hour HAZWOPER certification
- Prior experience supporting the Oil and Gas industry

Selected candidates must be able to travel. During the initial four months of your career with Earth Systems, up to two weeks per month of travel will be required to ensure you are trained to Earth Systems' standards. Thereafter, the position will require approximately one week per month of out of town travel. Earth Systems supports the oil exploration, production, refinery and terminal industry in the following areas: Environmental Engineering, Contamination Assessment and Remediation, Environmental Compliance, Property Transfer Assessments, and Permitting.

Strict adherence to corporate health and safety practices is a requirement for any position offered at Earth Systems.

We are an equal opportunity workplace that encourages diversity in the workforce.
