

## **Senior Environmental Engineer (PE) – Jacksonville, FL**

Earth Systems Inc. is an environmental consulting and engineering firm that supports regulatory agencies and private clients in the performance of hazardous waste and petroleum assessment and remediation. Our areas of expertise include Environmental Engineering, Contamination Assessment and Remediation, Environmental Compliance, Property Transfer Assessments, and Permitting. We are looking for a creative, energetic, and knowledgeable Environmental Engineer with Project Management experience and with a wealth of industry experience with a talent for process optimization. To be a successful candidate, you should be communicative, observant, organized, and committed to reaching project goals. You should also possess strong interpersonal, time management, and presentation skills.

### **JOB DESCRIPTION**

Senior environmental engineers lead a variety of environmental and/or engineering projects for their organization. They work with facilities to ensure that their environmental projects meet all requirements set by the government and their organization. These engineers must develop and communicate goals and expectations with their team, providing guidance, feedback, and discipline to subordinates as necessary. Additionally, they help guide their organization's interactions with state, local, and federal agencies. Senior environmental engineers are also responsible for making sure that projects under their supervision are finished within budget limitations and within deadlines. They provide presentations to management for ongoing projects as necessary. With that being said, we are looking for a candidate with the experience to perform the following tasks:

- Supervise and participate in contamination assessment activities including the installation of soil borings and monitoring wells and collection of soil and groundwater samples
- Design, install, and operate remedial systems that effectively treat hazardous waste and hydrocarbon impacted soil and groundwater
- Develop client specific Spill Prevention, Control and Countermeasure Plans (SPCC) and Stormwater Pollution Prevention Plans (SWPPP)
- Hazard and risk management, environmental management, and emergency response planning
- Air Permitting and Air Compliance
- Miscellaneous Regulatory Permitting
- Has experience with or knowledge of Phase I and Phase II Environmental Site Assessments
- Has experience in assisting in or preparing Assessment and Remediation Reports
- Client Relations

This position may require travel within Florida and surrounding states.

**JOB REQUIREMENTS** (You will not be considered unless you have met these requirements):

- In order to break into this competitive line of work, you will need a bachelor's degree in Engineering with an Environmental Science background
- We are looking for a licensed Engineer; please only apply to this position if you have your PE
- You will need a minimum of 8 years of experience with the above-mentioned tasks. Prior experience supporting the Oil and Gas Industry is a plus
- Experience working with FDEP is also a plus
- Prior experience supporting the E&P industry
- Demonstrable record of transitioning hazardous waste sites from remedial design through regulatory closure
- We have a serious commitment to safety. Our candidate needs to share this value and adopt the company's Safety Program. You will also need to pass a drug test, background check and must have a satisfactory driving record in accordance with the company's driving policy
- A 40-hour HAZWOPER certification is needed to work here at Earth Systems, if you are certified already, that is a plus

Salary is based on experience.

Earth Systems offers competitive compensation, excellent benefits packages and the opportunity to work in a fast-growing, successful, team-oriented environment. Bonuses and commissions are available for employees who successfully expand Earth Systems' existing client base.

Earth Systems is a drug-free workplace. Strict adherence to corporate health and safety practices is a requirement for any position offered at Earth Systems.

We are an equal opportunity workplace that encourages diversity in the workforce.
