

Environmental Engineer (PE or EIT) – Lantana, FL

Earth Systems Inc. is an environmental consulting and engineering firm that supports regulatory agencies and private clients in the performance of hazardous waste and petroleum assessment and remediation. Our areas of expertise include Environmental Engineering, Contamination Assessment and Remediation, Environmental Compliance, Property Transfer Assessments, and Permitting. We are looking for a creative, energetic, and knowledgeable Environmental Engineer with Project Management experience and with a wealth of industry experience with a talent for process optimization. To be a successful candidate, you should be communicative, observant, organized, and committed to reaching project goals. You should also possess strong interpersonal, time management, and presentation skills.

JOB DESCRIPTION

Environmental engineers are technological advisers who help with the growing challenges of land use, pollution, resource regulation and environmental laws. They use technology to help meet these challenges and develop sound solutions. In this way they are vital to helping form public policy to regulate the land, air and water resources for generations to come. Businesses now use environmental engineers to understand how to keep their impact on the environment to a minimum.

Environmental engineers may work in the field and/or in an office. They can design, evaluate, or manage control systems for erosion and water as well as waste processing facilities. They also monitor for pollution by testing air and water quality and coming up with model projections. With that being said, we are looking for a candidate with the experience to perform the following tasks:

- Contractor Oversight during Environmental Emergency Response
- Groundwater and Soil Sampling
- Remedial Design and Implementation
- Remediation System O&M
- Task Management of remediation and assessment projects
- Preparing Assessment/Remediation Reports
- Soil, Water, and Air Permitting and Compliance
- Project Management
- Client Relations

This position would require approximately 25% travel within Florida and surrounding states.

JOB REQUIREMENTS (You will not be considered unless you have met these requirements):

- In order to break into this competitive line of work, you will need a bachelor's degree in a relevant subject such as Environmental Science, Engineering, or Geology
- We are looking for a licensed Engineer, please only apply to this position if you have your PE or your EIT with the anticipation that you will obtain your PE within 6 months of hire

- You will need between 4-6 years of experience with the above-mentioned tasks. Prior experience supporting the Oil and Gas Industry is a plus
- Experience working with FDEP is also a plus
- We will ask you for a technical writing sample, you must have experience writing technical reports
- We have a serious commitment to safety. Our candidate needs to share this value and adopt the company's Safety Program. You will also need to pass a drug test, background check and must have a satisfactory driving record in accordance with the company's driving policy
- A 40-hour HAZWOPER certification is needed to work here at Earth Systems, if you are certified already, that is a plus

Salary is based on experience.

Earth Systems offers competitive compensation, excellent benefits packages and the opportunity to work in a fast-growing, successful, team-oriented environment. Bonuses and commissions are available for employees who successfully expand Earth Systems' existing client base.

Earth Systems is a drug-free workplace. Strict adherence to corporate health and safety practices is a requirement for any position offered at Earth Systems.

We are an equal opportunity workplace that encourages diversity in the workforce.
