

Environmental Technician

Job Description

Earth Systems Inc. is an environmental consulting and engineering firm that supports regulatory agencies and private clients in the performance of hazardous waste and petroleum assessment and remediation. Our areas of expertise include Environmental Engineering, Contamination Assessment and Remediation, Environmental Compliance, Property Transfer Assessments, and Permitting. We are looking for a creative, energetic, and knowledgeable Environmental Engineering Technician with a wealth of industry experience and a talent for process optimization.

General Job Description

An Environmental Engineering Technician is primarily trained in the skills and techniques related to a specific branch of engineering, with a practical understanding and has general fundamental engineering concepts. Environmental Engineering Technicians often assist engineers and technologists in projects and research and development. An Environmental Engineering Technician sits between a skilled craft worker and a Technologist. To be a successful candidate, you should be communicative, observant, organized, and committed to reaching project goals. You should also possess strong interpersonal, time management, and presentation skills. An Environmental Engineering Technician, typically working under the direction of an environmental scientist, monitors the environment and investigates sources of pollution by performing laboratory and field tests. He or she may be a member of a team that includes scientists, engineers, and technicians from other disciplines. With that being said, we are looking for a candidate with the experience to perform the following tasks:

- Well Drilling and Installation Oversight
- Geotechnical Testing
- Soil, Water, and Soil-Vapor sampling
- Remediation System Installation Oversight
- Remediation System O&M and troubleshooting
- Core Drilling and Soil Borings
- Assist with Health & Safety Training
- Assist with Remediation and High-Resolution Site Characterization projects
- Assist with Technical Training

This position will require travel throughout Florida.

JOB REQUIREMENTS

(You will not be considered unless you have met these requirements):

A bachelor's degree in a relevant subject such as Environmental Science, Engineering, or Geology is a plus, but not required.

- You will need between 1-3 years of experience with the above-mentioned tasks. Prior experience supporting the Oil and Gas is preferred, but not required.
