

Environmental Engineer (PE or EIT) – Bismarck, ND

Earth Systems Inc. is an environmental consulting and engineering firm that supports regulatory agencies and private clients in the performance of hazardous waste and petroleum assessment and remediation. Our areas of expertise include Environmental Engineering, Contamination Assessment and Remediation, Environmental Compliance, Property Transfer Assessments, and Permitting. We are looking for a creative, energetic, and knowledgeable Environmental Engineer with Project Management experience and with a wealth of industry experience with a talent for process optimization. To be a successful candidate, you should be communicative, observant, organized, and committed to reaching project goals. You should also possess strong interpersonal, time management, and presentation skills.

JOB DESCRIPTION

Environmental engineers are technological advisers who help with the growing challenges of land use, pollution, resource regulation and environmental laws. They use technology to help meet these challenges and develop sound solutions. In this way, they are vital to helping form public policy to regulate the land, air and water resources for generations to come. Businesses now use environmental engineers to understand how to keep their impact on the environment to a minimum.

Environmental engineers may work in the field and/or in an office. They can design, evaluate, or manage control systems for erosion and water as well as waste processing facilities. They also monitor for pollution by testing air and water quality and coming up with model projections. With that being said, we are looking for a candidate with the experience to perform the following tasks:

- Design, install, and operate remedial systems that effectively treat hazardous waste and hydrocarbon impacted soil and groundwater.
- Develop client-specific Spill Prevention, Control and Countermeasure Plans (SPCC) and Stormwater Pollution Prevention Plans (SWPPP)
- Hazard and risk management, environmental management, and emergency response planning
- Supervise and participate in contamination assessment activities including the installation of soil borings and monitoring wells and collection of soil and groundwater samples
- Preparing Assessment and Remediation Reports.
- Transitioning hazardous waste sites from remedial design through regulatory closure

We're looking for somebody with experience and familiarity with ND and the outlying areas. This position would require approximately 25% travel within North Dakota and surrounding states.

JOB REQUIREMENTS (You will not be considered unless you have met these requirements):

- You will need a bachelor's degree in a relevant subject such as Environmental Science, Engineering, or Geology
- Professional Engineering license

- We are looking for someone that has a minimum of 4-8 years of demonstrated experience with the above-mentioned tasks
- An individual with strong written and oral communication skills, strong desire to provide excellent, innovative, practical customer services and a commitment to technical excellence
- Experience or knowledge of the ND EHS technical regulations and guidance documents.
- Strong commitment to the company's Safety Program; follow company safety standards, site safety standards and maintain safe workplace practices
- Must pass drug test, background check and must have a satisfactory driving record in accordance with the company's driving policy
- Prior experience supporting the E&P industry is preferred

Salary is based on experience.

Earth Systems offers competitive compensation, excellent benefits package and the opportunity to work in a fast-growing, successful, team-oriented environment. Bonuses and commissions are available for employees who successfully expand Earth Systems' existing client base.

Earth Systems is a drug-free workplace. Strict adherence to corporate health and safety practices is a requirement for any position offered at Earth Systems.

We are an equal opportunity workplace that encourages diversity in the workforce.
