

## **Environmental Engineer - Belmar NJ**

Earth Systems Inc. is an environmental consulting and engineering firm that supports regulatory agencies and private clients in the performance of hazardous waste and petroleum assessment and remediation. Our areas of expertise include Environmental Engineering, Contamination Assessment and Remediation, Environmental Compliance, Property Transfer Assessments, and Permitting. We are looking for a creative, energetic, and knowledgeable Environmental Engineer that has Office Management experience with a wealth of industry experience and a talent for process optimization. To be a successful candidate, you should be communicative, observant, organized, and committed to reaching project goals. You should also possess strong interpersonal, time management, and presentation skills.

### **Earth Systems seeks an Environmental Engineering Consultant to perform the following tasks:**

- Manage the ins and outs of day to day happenings in the Belmar office.
- Generate new business by thinking of new marketing strategies and work with clients to optimize our current database.
- Help with the development the office structure to optimize our current workload.
- Design, install, and operate remedial systems that effectively treat hazardous waste and hydrocarbon impacted soil and groundwater.
- Develop client-specific Spill Prevention, Control and Countermeasure Plans (SPCC) and Stormwater Pollution Prevention Plans (SWPP).
- Hazard and risk management, environmental management, and emergency response planning
- Supervise and participate in contamination assessment activities including the installation of soil borings and monitoring wells and collection of soil and groundwater samples
- Preparing Assessment and Remediation Reports.
- Transitioning hazardous waste sites from remedial design through regulatory closure.

This position may require travel throughout NJ and the Tri-State Area. This position requires not only technical knowledge but office management as well.

**JOB REQUIREMENTS** (You will not be considered unless you have met these requirements):

- You will need a bachelor's degree in a relevant subject such as Environmental Science, Engineering, or Geology.

- Professional Engineering license
- We are looking for someone that has a minimum of 4-8 years of demonstrated experience with the above-mentioned tasks.
- Has an understanding and has some experience with Air Permitting and Air Compliance, Phase I and Phase II Environmental Site Assessments, and Miscellaneous Regulatory Permitting
- An individual with strong written and oral communication skills, strong desire to provide excellent, innovative, practical customer services and a commitment to technical excellence
- Knowledge of NJDEP technical regulations and guidance documents.
- Strong commitment to company's Safety Program; follow company safety standards, site safety standards and maintain safe workplace practices
- Must pass drug test, background check and must have a satisfactory driving record in accordance with the Company's driving policy
- Prior experience supporting the E&P industry is preferred.

**Salary is based on experience.**

Earth Systems offers competitive compensation, excellent benefits package and the opportunity to work in a fast-growing, successful, team-oriented environment. Bonuses and commissions are available for employees who successfully expand Earth Systems' existing client base.

Earth Systems is a drug-free workplace. Strict adherence to corporate health and safety practices is a requirement for any position offered at Earth Systems.

We are an equal opportunity workplace that encourages diversity in the workforce.
